- Handle all payment options with one easy-to-use payment device
- Receive software updates at no additional charge
- Contact toll-free, live customer support

## DENTRIX POWERPAYLE EMV

Easily process card and smartphone payments

PowerPayLE EMV allows your practice to accept the payment methods your patients prefer, and process transactions directly through Dentrix. Now your patients can pay with traditional magnetic-stripe cards, EMV chip cards, or contactless smartphone-payment services such as Android Pay, Apple Pay and Samsung Pay. PowerPayLE EMV automatically posts payments to your ledger and improves your office productivity by eliminating double entries, reducing errors and decreasing patient check-out time.

### SIMPLIFY PAYMENT PROCESSING

The use of EMV (Europay, MasterCard and Visa) chip cards and contactless mobile apps means patients expect your office to accept a variety of payment methods.

By offering Henry Schein's latest payment options, it shows that your practice has new technology and is responsive to patient needs.

PowerPayLE EMV gives your patients more ways to pay while simplifying the payment process for your office. Tight integration with Dentrix automatically posts payments to your ledger—regardless of the payment method used.

### IMPROVE OFFICE PRODUCTIVITY

PowerPayLE EMV saves time for your team and your patients. Your team saves time processing credit/debit card payments and posting them to the ledger, because it happens automatically. Your patients save time at check-out by using their preferred payment method.

**CALL US TODAY AT 844.220.8062**

or visit [Dentrix.com/PowerPayLE\\_EMV](https://Dentrix.com/PowerPayLE_EMV) to start collecting and processing payments an easier way.

PowerPayLE EMV is an automated payment service included in your Service Bundle. It works seamlessly with Dentrrix to improve office productivity and your workflow.

## ONE PAYMENT DEVICE FOR ALL OPTIONS

The easy-to-use payment device for PowerPayLE EMV lets you process payments without tying up a phone line.

The Ingenico Lane/3000 PIN Pad reads magnetic-stripe cards, EMV embedded-microchip cards and contactless mobile devices. Use it as a hand-held device, or mount it on your office countertop.

## REDUCE OFFICE COSTS

With a variety of payment options, your patients are more likely to pay on the day of service. PowerPayLE EMV helps to improve your cash flow and reduce your billing and collection costs.

Accepting PIN-based debit card payments can also save your practice thousands of dollars in merchant transaction fees from various credit card issuers.

In addition, EMV and contactless payment methods use embedded technology that helps prevent fraudulent charges and their associated costs.

## LEVERAGE YOUR SERVICE BUNDLE

PowerPayLE EMV is included with your service bundle, and the payment device is sold separately. You don't have to buy additional software or pay upfront fees when you activate your PowerPayLE EMV payment solution.
