# EXPAND YOUR PRACTICE'S CARE

Dentrix Provides Effective, Timesaving and Engaging Tools That Enable Your Practice to Provide the Best Possible Patient Care

## Patient Care

Patient care is at the heart of your practice. Every decision you make for your practice is ultimately in service of providing better care for your patients.

Of course, as a business you must consider care decisions with financial and logistical needs. But because the quality of patient care is nonnegotiable, you must find ways to save resources and streamline processes while also improving your patients' experiences. Expanding patient care requires your practice to have adequate time to care for patients, effective tools that streamline diagnosis and treatment, and the ability to empower patients to be a part of their own care.

While some solutions provide the bare minimum for your practice to function, the combined solutions offered by Dentrix not only tackle each of these facets of patient care independently, but also work together to wholistically expand the care you provide.

**Dentrix is more than a collection of software; it is a complete solution that helps your practice operate effectively and improve patient care through integrated tools and automated processes.**

“Dentrix gives us the ability to educate patients and answer their questions in a way that we couldn't in the past. It creates a more interactive relationship with the patient.”

— Gerald Bittner Jr., DDS, San Jose, CA

# THE DENTRIX TOOLKIT

Dentrix enables expanded patient care through integrated tools that save your employees' time, improve the care you provide and empower patients to engage in their own care.

## Dentrix Treatment Planner

Dentrix makes treatment planning easier by allowing you to select and drag multiple teeth in a chart, post procedures for those teeth and follow intuitive prompts for multi-surface requirements. Each time you complete a planned procedure, Dentrix automatically transfers all information directly to the patient's ledger.

## Dentrix Pay

Dentrix Pay is an integrated payment processing solution that improves cash flow with convenient payment options and helps protect against lost payments. Dentrix Pay processes all payment types and enables automatic recurring payments. Its native integration with Dentrix makes it a reliable payment solution that saves valuable time for your front office staff, allowing them to process payments faster.

## Dentrix eClaims

Dentrix eClaims gives you the ability to accelerate the insurance claims process so you get paid faster. eClaims can reduce your number of rejected claims by verifying that all the necessary components are included with your claims, and everything you need to complete a claim, including digital X-rays, perio charts and photographs, can be easily attached right from within your practice management software.

## Dentrix Smart Image

Dentrix Smart Image expands your ability to be more efficient by connecting your clinical and financial processes into one workflow. Smart Image automatically associates diagnostic images with the correct CDT codes, and attaching coded images to claims saves you time from manual entry and helps you get paid for the procedures you perform.

## Dentrix Imaging Center

Dentrix Imaging Center is a comprehensive imaging solution that integrates with Dentrix to simplify your imaging technology. It works with a broad range of imaging hardware, saving you time and frustration by eliminating the need for third-party software or a separate imaging server.

## Dentrix Perio Chart and 3D Clinical Charts

The Dentrix Perio Chart makes it easy to record and store important perio metrics that you can view numerically or graphically, while the 3D Dentrix Clinical Chart lets you record all procedures across multiple tooth surfaces. Plus, the three-dimensional modeling view gives you and your patients a more lifelike representation of the dental chart.

## Dentrix Website

With Dentrix Website, you can give your patients the means to securely access personal information online, reducing the number of time-consuming phone calls your staff need to process while providing improved customer service. Your patients will have round-the-clock access to view upcoming appointments, treatment plans and account balances, easily accessible on your website.

## Dentrix Patient Engage

Dentrix Patient Engage allows you to automatically send appointment and re-care reminders, as well as build and protect your practice's reputation with surveys and patient newsletters. Patient Engage helps you reduce missed appointments and improve production as you build relationships with current and future patients.

# EXPAND YOUR CARE NOW

Dentrix streamlines your practice technology into one management system for a smarter workflow. You can improve patient care while also improving your bottom line with our integrated and built-in solutions. Dentrix features include

Business management

Clinical efficiency

Patient communication

Billing and collections

Integrated products

Training and education

Dentrix helps you simplify business management and provides you with everything you need to make a successful transition to Dentrix to set you on the path to greater profitability and productivity.

## Learn more about Dentrix

“When I open a patient’s chart, I can do anything I want. [Dentrix is] very easy to use on my end.”

– Edmond Suh, DDS, Wake Forest, NC

## Backed by the Power of Henry Schein One

While each tool in the Dentrix toolkit works on its own to expand your practice’s ability to operate efficiently, Dentrix is also built on the power of Henry Schein One. This comprehensive set of integrated solutions makes Dentrix more than just a collection of tools — it is a seasoned partner that provides quality customer service and a variety of online and in-person training tools designed to help your practice work toward better outcomes, more options and greater success.

### Dentrix Connected Solutions

Expand your Dentrix platform by using innovative, third-party technology from leading dental vendors. These technologies are tested and certified to provide true integration with Dentrix. Look for the Dentrix Connected logo whenever you consider third-party vendor solutions.

### Expert Support and Training

If you need assistance to accomplish a critical task in Dentrix, expert customer service is only a phone call or online chat away. Plus, Henry Schein One offers you and your team several ways to learn how to get the most out of your Dentrix practice management software. Online tutorials, hands-on workshops, half-day training seminars and many more options are available to help you master the software that runs your practice. Choose the Dentrix training that matches your needs, your schedule and your budget.
