Insurance Pay helps you:

- Process VCCs from insurance carriers efficiently
- Keep your cash flow from stalling
- Unbatch and post VCC payments with just a few clicks
- Minimize manual entry and the errors associated with it
- Work directly in the Dentrix Ledger

Now for Virtual Credit Card Payments from Insurers Too!

"The batch insurance payment feature in Dentrix is a time saver and a stress saver."

- Charlotte Skaggs
Certified Dentrix Trainer

INSURANCE PAY, A FEATURE OF DENTRIX PAY

Match VCC insurance payments with the right patient ledgers and claims existing patients

SOLVE THE BATCHED PAYMENT PROBLEM

As virtual credit cards (VCCs) or electronic credit cards become increasingly common payment methods for insurance carriers, your office staff may be spending more time than usual processing insurance payments.

Because the one-time-use VCC payment can belong to multiple patients, this collections process is not a straightforward match to a single ledger. Without Insurance Pay, a feature of Dentrix Pay, these batched payments require painstaking manual entry to outstanding insurance claims and multiple patient ledgers.
GET BACK TO COLLECTIONS AS USUAL

Insurance Pay offers an ideal solution to the problem of VCCs that batch multiple compensations in one payment. And if you have Dentrix Pay, activating this time-saving feature takes just a few clicks.

Once activated, Insurance Pay uses the Batch Insurance Payment Entry dialog box in the Dentrix Ledger. From this dialog, your team can process VCCs from insurance carriers quickly and easily, posting each claim as they normally would with any other insurance payments. The money collected from the VCC payment automatically disperses to patients and ledgers.

HENRY SCHEIN ONE

Process VCCs from insurance carriers quickly and disperse to multiple patient ledgers with the Insurance Pay feature in Dentrix Pay.

HOW IT WORKS

Access as Part of Dentrix Pay

Enable Insurance Pay within Dentrix Pay and experience a seamless workflow that is native to Dentrix.

Apply Reimbursements Appropriately

Enter an individual payment and then split it for multiple patients' accounts within the Dentrix Ledger.

Process Payments in Four Steps

To process a VCC payment: 1) select the insurance carrier, 2) enter the payment amount, 3) indicate that the payment is from a credit card and 4) enter the card information.

Post Claims in One Dialog Box

Disperse a single VCC payment in the Batch Insurance Payment Entry dialog to both patient claims and ledgers as needed.

BENEFITS

EASILY SEPARATE A LUMP TRANSACTION

Spend less time and have fewer opportunities for error because you can apply virtual and electronic insurance credit card payments across multiple patient accounts.

PROCESS PAYMENTS EFFICIENTLY

Within the Dentrix Ledger, enjoy the efficiency of using a single dialog box to process virtual credit card payments.

POST PAYMENTS AS NORMAL

Use the intuitive Dentrix Pay workflow your team already knows to easily post related claims after processing virtual credit card payments.

MINIMIZE DATA ENTRY

Save time and reduce hassle by conducting the entire procedure of processing and posting payments with minimal manual entry and just a few mouse clicks.
