

Digital and Streamlined Workflow Benefits of Dentrix Voice

- Simplifies the recording of perio results for the hygienist
- Saves dentist time when entering clinical notes and other staff time when entering other written information
- Allows for multiple concurrent users
- Helps improve infection control for staff and patients
- Improves overall speed and efficiency
- Integrates with existing Dentrix software
- Reduces costs for perio exams
- Helps educate patients
- Improves treatment acceptance

Why choose Dentrix Voice?

Dentrix Voice recognizes speech with 99.9% accuracy allowing for fast, flawless exams, dictation and other notes.

Streamline perio exams by giving your hygienists an extra hand without the costs of extra staff. Reduce dentist and front-office load by eliminating time spent on manual entry.

DENTRIX VOICE

Improve the speed and efficiency of your practice

HANDS-FREE AND ASSISTANT-FREE

Dentrix Voice saves time across your entire practice — from your hygienists and dental assistants to your dentists and office staff. Dentrix Voice, powered by Bola AI, enables your team to use voice entry for perio exams, clinical notes and other essential office correspondence. It eliminates common needs for manual entry, allowing your team to work hands-free and assistant-free.

With its intuitive, easy-to-learn commands, your staff can be up and running the same day. And it couldn't be easier to set up — with a rapid install and no required configuration.

SAFER, EASIER AND MORE COST-EFFECTIVE

Dentrix Voice provides your practice with hands-free, assistant-free technology that helps reduce infection risks during perio exams while simultaneously giving you a solution that's easier to use than traditional manual entry.

Because Dentrix Voice is hands-free, hygienists don't have to enter perio scores manually during an exam or rely on an assistant in the operatory, which provides you a cost savings on the PPE and additional staff required by traditional methods.

Voice entry capabilities extends beyond perio exams. Now busy dentists can speed up their clinical notes and busy office managers can make their typed documentation easier and faster. Saving time and money for the entire office.

BENEFITS

Save Time

Eliminate time spent on manual entry across your practice by dictating perio results, clinical notes and more. And because of its near-perfect accuracy, your team won't have to spend time fixing the inevitable errors that come from manually entering data.

Adopt Quickly and Easily

With its easy-to-learn commands, intuitive user interface, and seamless integration with Dentrrix, Dentrrix Voice takes minimal staff time to learn. Dentrrix Voice requires no voice training or configuration, making it ready for a same-day start; the user-centric design of the perio tool allows hygienists to select their preferred workflow.

Practice Notes

Dentrrix Voice's functionality extends beyond exams. Use voice entry to take clinical notes, add information to patient files, update insurance data, and enter narrative information for other essential office tasks.

Engage Patients in Their Oral Care

Provide patients the opportunity to hear their perio scores called out, educating them about their perio treatment and helping improve treatment acceptance.

Streamline Office Administration

Reduce the amount of time your dentists, hygienists and front-office staff spend entering information by using voice entry functionality for your entire practice.

KEY FEATURES

REAL-TIME SYNC WITH DENTRIX

Because Dentrrix Voice is integrated with Dentrrix, perio results called out by a single hygienist are automatically recorded in the Dentrrix perio chart. It also captures clinical notes dictated by a dentist or insurance and billing data spoken by your office staff — all while taking advantage of most speakers' natural 130-150 word per minute rate.

OUTSTANDING SPEECH RECOGNITION

Dentrrix Voice recognizes speech with 99.9% accuracy — regardless of speaker, accent, phrasing or the kind of microphone used. Background noises, including music and movies, are also screened out. Because Dentrrix Voice is programmed with a dental lexicon, it allows users to speak fully, without resorting to shorthand or abbreviations, giving you more complete notes.

AUTOMATIC CALCULATIONS

The Perio Health Index (PHI) is calculated for each perio exam automatically, showing patients their results in an easy-to-understand format that engages them in their care. PHI scores can be easily compared across visits to show progress.

RAPID INSTALLATION

In addition to quick staff adoption, Dentrrix Voice is fast and easy to install.
